Facilities of Differdange

A significant revamp of the finishing line has occurred in 2018.

NEW FACILITIES

- Roller-Straightener: world's largest
- Cold saw : improves straightness and yield optimisation
- Marking robots : fully automatic for accuracy and speed
- Gag press

BENEFITS

- Consistency of straightness
- Faster shipment
- Improved reliability of delivery
- Improve «look&feel» of the sections
- Ultimate reference for heavy sections

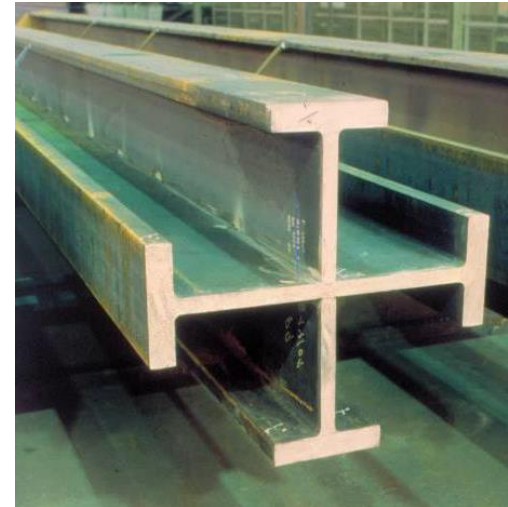

Products of Differdange

The plant of Differdange products the highest, largest and heaviest beams of the world.

EXCLUSIVITY

Differdange has the exclusivity

- Heavy and Jambo ranges
- Highstar and offshore grades which are used in the highest buildings in the world

THE BEAM FINISHING CENTER

It offers additional services to customers

- Bridges
- Buildings
- Industrial infrastructures
- Foundations
